August 4th-6th at The Ohio State University.

THISTLETHWAITE'S THEOREM FOR VIRTUAL LINKS

Jeremy Voltz

The Ohio State University [Mentor: Sergei Chmutov]

Abstract of Report Talk: Thistlethwaite's theorem relates the Jones polynomial of a link to the Tutte polynomial of a corresponding planar graph. We give a generalization of this theorem to virtual links by way of ribbon graphs and the Bollobás-Riordan polynomial. [VJ14152839]
